

Scenario:

You are a very busy business woman/man and your doctor suggests you lose weight. You find yourself continuously looking for ways to stop eating unhealthy and support your dietary restrictions. You would like to find healthy eating alternatives.

Task 1: finish the checklist of what you want for your dietary restrictions.

Task 2: Go through the grocery store and scan the ingredients portion of your products.

Task 3: Add these items to the shopping cart if they satisfy your dietary restrictions.

What changes should I make?

- The app should be more clear on where to start
- You should enter in a dietary option instead of the list
- Access to the cart should be more clear

What should you keep the same?

- Scanning the ingredients
- The prices on the shopping part
- The photo of the food
